Index

Preface

Welcome to the Aloha® Takeout Report Guide, a comprehensive analysis of the reporting features provided by the Aloha Takeout system. You will learn the benefits of each report and see selected examples to help you further understand the vast reporting capabilities.

Reports are essential in a business. They gauge the progress of your restaurant and determine your success or failure. In a corporation, reports provide an important link from the store level to corporate. Some of the reports include comparison data. These comparisons could be between employees, against promised delivery times to customers, current or past business days.

The reports contained in Aloha Takeout can also assist you in planning for future orders so that you may plan your staffing needs, as well as ensure you have sufficient items on hand to accommodate these orders. Additionally, Aloha Takeout enables you to run reports so that you can identify your top customers and pinpoint absent customers.

Aloha Takeout contains two Front-of-House (FOH) and multiple Back-of-House (BOH) reports. In addition to viewing and printing the Aloha Takeout BOH reports, you can also export them to a .csv file. Aloha Takeout provides you with a wide variety of reports, such as the Actual vs. Estimated Delivery report, the Late Delivery report, the Future Orders report, the Catering Detail report, the Customer Detail report, and more.

Support information

If you have any questions about the material covered in this document, please contact your internal support department, or your local NCR Voyix representative. NCR Voyix provides a wide range of support programs—contact your local Account Team for more details.

If you have any problems when reading the document, please refer to the back of the document. You will find our electronic mail address. Please take the time to reply, as your comments would be appreciated.

How this guide is organized

The following list provides a brief description of the contents of this document.

Chapter 1, “Analyzing your FOH reports”

This chapter discusses the FOH reports, which provide you with up to the minute reporting data from the FOH terminals. Some reports appear on screen, and some you can print.

Chapter 2, “Analyzing your BOH reports”

This chapter discusses the BOH reports, which enable you to operate a successful business. The chapter provides information about how to limit and sort the information that goes into your reports, and how to print reports before or after previewing them on the screen.

Index

The index gives a list, in alphabetical order with page references, of the topics and tasks covered in this document.

Document conventions

The following typographical conventions are used in this document:

Table Pref-1: Typographical Conventions

Style	Indicating
Bold	An option that you can select on the screen, for example, Previous
<i>BoldItalic</i>	Extra emphasis A physical key, for example, <i>Enter</i>
<code>Code</code>	Text displayed on a screen Commands or data entered by the user Program text
<i>Italic</i>	The first reference to a keyword ¹ The title of a publication, for example, Product Overview A file or folder name, for example, C:\Program Files\NCR

Chapter 1: Analyzing your FOH reports

About Aloha Takeout FOH reports	1-2
Adding checkout buttons to the ATO FOH screen	1-2
Configuring the employee checkout report to appear on FOH terminal	1-2
Analyzing the driver Pre-Checkout report	1-4
Analyzing the Employee Checkout report	1-7

About Aloha Takeout FOH reports

Aloha Takeout provides two Front-of-House reports, the driver Pre-Checkout and Employee Checkout reports. The information in these reports reflects totals for the current day, up to the hour at which you generate the report. Use these reports to review runs made by a driver, the payments tendered, non-cash tips received, the cash transactions, the delivery fees earned, and the cash owed to the store. Unlike the Back-of-House reports discussed in the next chapter, it is not possible to change the settings for these FOH reports.

While both reports print to the local receipt printer, only the Employee Checkout report is available for viewing on-screen, and this requires configuration to occur first. Refer to [“Configuring the employee checkout report to appear on FOH terminal” on page 1-2](#).

Adding checkout buttons to the ATO FOH screen

It is necessary to add two buttons to the ATO FOH screen, to provide a means for your drivers to access the two checkout reports. The Pre-Checkout button allows a driver to print and review their information before checking out, and the Checkout button allows a driver to view and print the Employee Checkout report, as well as complete a check out prior to clocking out.

1. Select **Maintenance > Takeout Configuration > Takeout Settings > Panel Options** tab.
2. Select the **Driver** tab.
3. Under the 'Actions' group bar, click the **Add** drop-down arrow, select **Pre-Checkout** as the Action type, and click **OK**. Repeat this **action** to add Checkout as an Action type.
4. Use **Move up** and **Move down** to rearrange the action buttons in the selected list and customize the order in which they appear on the ATO FOH screen.
5. Click **Save**.

Configuring the employee checkout report to appear on FOH terminal

To view the Employee Checkout report on-screen, ensure PrtIntr.dll resides in the Bin directory and that it is registered. You then need to add the appropriate command line to PrtIntr.ini and enable the COM interface.

To configure the PrtIntr.ini file:

1. Locate **PrtIntr.ini** in the Newdata directory and press **Enter**. The file opens in Microsoft® Notepad®.
2. Type **FOHDOC_CHECKOUT=1**, which is the command line specific to the Employee Checkout report.
3. Select **File > Save**.
4. Exit **Notepad**.
5. In new Aloha Manager or Aloha CFC, select **Utilities > POS > Refresh POS Data** or manually copy **PrtIntr.ini** into the Data directory.

To enable FOH COM interface:

1. Select **Maintenance > Business > Store > Store Settings** tab > **System** tab.
2. Under the 'Interfaces' group bar, select **Enable FOH COM Interface**.
3. Click **Save** and exit the **Store** function.

 **Caution: When these reports print, the FOH stalls momentarily as all resources are used to print or view. Do not continue to touch the Print button, or the FOH will not respond.**

To run a checkout report on the ATO FOH:

1. Touch **Drivers** on the navigation bar to access the Drivers screen.
2. Select a **driver**.
3. Touch **Pre Checkout** to run a Pre-Checkout report or touch **Checkout** to run an Employee Checkout report and check out the driver. The system prints the report to the local receipt printer.

Report Section	Description
Check Detail	<p>Check Detail includes a breakdown of each delivery order:</p> <ul style="list-style-type: none"> • The delivery run for the order. • The Aloha POS check number. • The delivery address. • The payment mode, either cash or non-Cash. An asterisk (*) in the NC column indicates the customer paid with a non-cash payment. • The total amount received, including non-cash tips. <p>The Check Detail section also includes a summary of the checks. The summary includes:</p> <ul style="list-style-type: none"> • The grand total amount received by the delivery driver, including non-cash tips. • The grand total amount received by tender type.
Non-Cash Tips	<p>Non-Cash Tips includes a breakdown of each delivery order:</p> <ul style="list-style-type: none"> • The delivery run for the order. • The Aloha POS check number. • The delivery address. • The non-cash tip for the order. <p>The Non-Cash Tips section also includes a summary of the non-cash tips received. The summary includes:</p> <ul style="list-style-type: none"> • The total amount of non-cash tips received by tender type. • The total amount of non-cash tips received.
Summary	<p>Summary calculates the 'Est Cash Owed' of the driver. The calculation is as follows: $\text{Est Cash Owed} = \text{Grand Totals} - \text{Tips} - \text{Non-Cash Payments} + \text{/- Cash Transactions} - \text{Tips}$.</p> <p>Tips are subtracted twice. Once from the Grand Total and again from the Est Cash on Hand.</p>

Report Section	Description
Service Times	<p>Service Times includes a breakdown of each delivery run of the driver:</p> <ul style="list-style-type: none">• The delivery run.• The departed time.• The return time.• The time gone.• The average time.• The number of stops for the delivery run.• The amount received for each run, not including non-cash tips. <p>Service Times also includes a summary of the delivery runs of the driver:</p> <ul style="list-style-type: none">• The total time out.• The total average time.• The total number of stops.• The total amount received, not including non-cash tips.

Analyzing the Employee Checkout report

The Employee Checkout report provides a breakdown of the transactions of the driver during a shift.

Prior to clocking out, a driver must check out.

Report Section	Description
Header	Header includes: <ul style="list-style-type: none"> • The store number. • The name of the delivery driver. • The shift for which the driver worked. • The revenue center for the delivery orders. • The date and time of the printing of the report.
Sales	Sales includes an itemized breakdown and calculation for Gross Sales. The Gross Sales is calculated as: Revenue items + Taxes + Sold Gift Certificates + Cash automatic gratuities + Deferred tips + Delivery fees + Surcharges + Not-redeemed tenders + Additional service charges.
Payments	Payments identifies the terminal for which the driver tendered payments and includes: <ul style="list-style-type: none"> • The total amount received for each tender type for which the driver received payment. Non-cash tender summaries include tips. • The total amount received for all tender types, including non-cash tips received.
Cash TXNS	Cash Transactions details the driver banks and drops between the driver and the cashier. If you enabled 'Cash to store at checkout,' the system calculates and executes the final transaction necessary so that the 'NET CASH OWED' amount is '0.00.'
Cash	<p>Cash calculates the TOTAL CASH OWED by or to the driver. TOTAL CASH OWED is calculated as: Cash Payments - Non-Cash Tips - Delivery Commissions - Cash Transactions. (The Cash Transactions amount is the TOTAL TXNS amount from the CASH TXNS section.)</p> <p>If the driver is configured to receive delivery fees, the TOTAL CASH OWED may be a negative amount, which is a commission owed to the driver.</p>
Non-Cash tenders	<p>Non-cash tenders provides, by non-cash tender, the following:</p> <ul style="list-style-type: none"> • The Aloha POS check number. • The last four digits of the non-cash tender. • The total amount of the check. • The non-cash tip received. <p>The non-cash section also includes:</p> <ul style="list-style-type: none"> • The total amount received for a non-cash tender. • The total amount of non-cash tips received for a tender type.

Report Section	Description
Delivery Details	Delivery Details includes: <ul style="list-style-type: none">• The total number of deliveries by the driver.• The total amount of delivery commissions earned by the driver.• The Aloha POS check number for each delivery.• The customer name.• The total of the check, excluding any non-cash tips.
Audit	Audit includes the number of guests, the number of checks, and any rounding benefit.
Sales Detail	Sales provides a summary of Gross Sales, Net Sales, and sales by revenue center.

About Aloha Takeout BOH reports

The Aloha Takeout Back-of-House (BOH) reports provide vital information to aid you in operating, tracking, and monitoring your takeout and delivery business. The reports menu contains selections that enable you to run reports on driver and delivery activity, open orders, future orders, catering orders, deposits, credits, and your customers.

The report formats are configured by the user and no longer require font selection. Fonts are built in to the system using the True Type capabilities of the Microsoft® Windows® operating systems.

Some reports are a collection of separate sections that display selected information defined by you using the report settings dialog box. The examples given in this book do not display actual data and are intended to be used as a guide.

In this guide you learn how to:

- Define and prioritize report fields for specific reports.
- Navigate through the Preview Report screen.
- Export a report to a .csv file.

Key benefits of the Aloha Takeout BOH reports

The following is a list, in menu order, of the Aloha Takeout reports available to you and their key benefits:

Report	Description
Actual Vs. Estimated Delivery Report	Details the departure and return time of the driver compared to the estimated trip time.
Speed of Service Delivery Report	Displays thresholds in the ordering process that may identify service issues.
Driver Details Report	Enables you to focus on driver accountability with payment types, tips, and driver fees for each delivery.
Late Order Report	This report is targeted for a future release.
Open Orders Report	Displays any open ATO orders, allowing you to check for open orders prior to running End-of-Day.
Future Order Report	Displays the details of future orders for any future date selected.
Future Order Item Summary Report	Displays the items ordered for a future date selected. Enables you to view the items needed and ensure you have enough product to produce the scheduled orders.
Pending Deposits Report	Displays the current deposit liability for the store.
New Deposits Report	Displays the deposits collected within the selected date range.
Withdrawn Deposits Report	Displays the deposits withdrawn within the selected date range. Deposits may be applied, refunded, or surrendered to be considered withdrawn.

Report	Description
Unclaimed Deposits Report	Displays the deposits that were not applied to the future order when the order was released or when an order was closed by the EOD without applying the deposit. This report accounts for discrepancies.
Mailing List Report	Enables you to display, print, or export a customer mailing list for all the customers in your database
Absent Customer List Report	Enables you to identify customers who have not ordered from you recently.
Top Customer Report	Enables you to identify those customers with the most visits.
Customer Detail Report	Enables you to track down specific orders for customers.
Call Back List Report	Outputs a list for a selected date or range of dates for you to call customers who have placed call in, delivery, or catering orders.
Customer Credit Report	Displays a list of clients who have a credit account balance.
Catering Summary Report	Displays the details of future catering orders for any future date selected.
Catering Detail Report	Displays the items ordered for a future catering event. Enables you to view the items needed and ensure you have enough product to produce the scheduled catering orders.

Navigating the Reports Preview screen

The navigation buttons located across the top of the Report Preview screen provide common options for many, but not all of the reports. Click the desired button, if it is available for the particular report:

Runs the report. Select this button when you are ready to run a particular report.

Toggles the display to a page thumbnail view on an extra sidebar. Select this button again to collapse the sidebar.

Prints the report.

Copies the selected text to the clipboard.

Searches the report for specified text and opens the Find dialog box.

Zooms out on the report.

Zooms in on the report.

Displays the current zoom percentage of the report. You can enter a percentage to change the display size of the report.

Sizes the report to maximum width of the page.

Sizes the report to fit the full page of the screen.

Changes the view of the report to a single page.

Changes the view of the report to a continuous scrolling page.

Allows you to specify the number of pages to display in a single view.

Goes to the first page of the report.

Goes to the previous page of the report.

Identifies the current page and the total number of pages in the report.

Goes to the next page of the report.

Goes to the last page of the report.

Goes backward a page.

Goes forward a page.

Shows the command line for the report.

Choosing a report date range

Most Aloha Takeout reports allow you to select a specific date or date range to run the report. The reports function contains pre-configured dates and date ranges for you to use, or you can select your own date or date range.

To use a pre-configured date range:

1. On the Reports menu, select a **report** to run. The Report Preview screen appears. When the option to choose a date or date range is available, the system displays a 'Report Date Range' filter on the left side of the Report Preview screen.

Figure 2 - 1 Report Preview Screen

2. Select one of the pre-configured date ranges.
3. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

To use a custom date range:

1. On the Reports menu, select a **report** to run. The Report Preview screen appears. When you have the option to choose a date for your report, Report Date Range appears on the left side of the Report Preview screen.

The screenshot shows a 'Report Date Range' dialog box with two tabs: 'Selected' and 'Custom'. The 'Custom' tab is active. It contains two calendar pickers. The 'Start Date' picker shows 'September, 2013' with a calendar grid where the 1st is highlighted. The 'End Date' picker also shows 'September, 2013' with a calendar grid where the 30th is highlighted. Below each calendar is a 'Today' button showing '11/26/2013'.

Figure 2 - 2 Report Date Range, Custom

2. Select the **Custom** tab.
3. Under 'Start Date,' use the **right** and **left arrows** to select a **start** and **end date**.
4. Under 'End Date,' use the **right** and **left arrows** to select a **start** and **end date**.
5. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Exporting report data

Most Aloha Takeout reports allow you to export the report information to a .csv file. For example, you may want to export your mailing list to a file to create a 'Mail Merge' with Microsoft® Word® or you may want to export an email list to email your customers.

1. On the Reports menu, select a **report**.
2. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

3. In the Report Preview toolbar, click  located to the right of the command line button. Most reports contain only one export option. However, some reports, such as the Customer Mailing List, contain multiple export options. The 'Save Export Output As' dialog box appears.

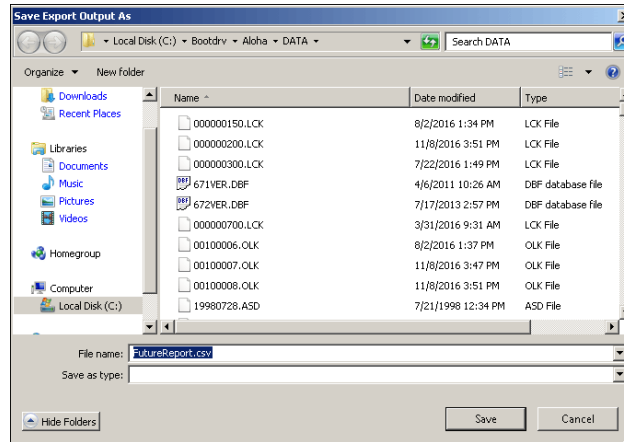

Figure 2 - 3 Save Export Output As Dialog Box

4. Navigate to **a folder** on your system to save the file.
5. Use the **default file name** or type **a file name** that best meets your operational needs.
6. Click **Save**.

#	Column	Description
11.	Act. Time	The time difference between the dispatch and return of the driver.
12.	Variance	The variance in minutes between the actual time and the estimated delivery time. Calculation: Act. Time - Est. Time = Variance.
13.	Percent	The percentage difference between the actual and estimated delivery times.
14.	Departed	The time the driver was dispatched in ATO.
15.	Returned	The time the driver returned in ATO.
16.	Order Count	The total number of orders the driver delivered during his shift.
17.	Trip Count	The total number of runs the driver made during his shift.
18.	Total Trip Duration	The total amount of time the driver was dispatched.
19.	Avg. Trip Duration	The average time of each trip.

There are no report settings available to control the Actual vs. Estimated Delivery report.

Speed of Service report

The Speed of Service report displays thresholds in the ordering process that may identify service issues. You can evaluate order time, in-store time, departure time, and return time, to determine if they are outside of service standards.

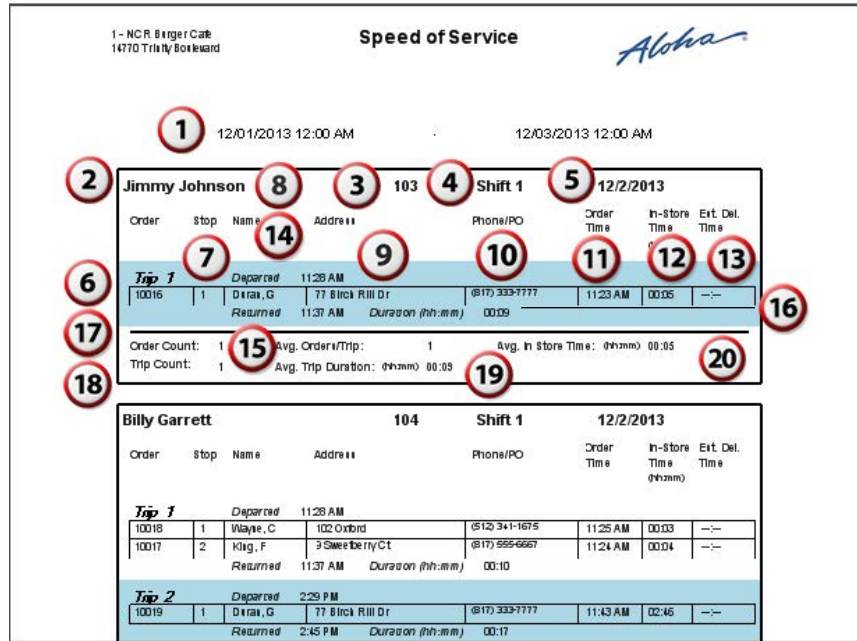

Figure 2 - 5 Speed of Service Report

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Driver Name	The name of the driver.
3.	Employee Number	The Aloha POS assigned employee number.
4.	Shift	The shift(s) the driver worked for the selected date range.
5.	Date	The date for the report information.
6.	Order	The Aloha POS check number.
7.	Stop	The order of the stop within the trip.
8.	Name	The customer name.
9.	Address	The selected delivery address for the customer.
10.	Phone	The selected phone number for the customer.
11.	Order Time	The time the order was sent to the kitchen.
12.	In-Store Time	The amount of time between order receipt to driver dispatch.

#	Column	Description
13.	Est. Del. Time	The estimated delivery time to each stop. This feature is not currently supported.
14.	Departed	The time the driver was dispatched in ATO.
15.	Returned	The time the driver returned in ATO.
16.	Duration	The difference in time between the departed time and returned time.
17.	Order Count	The total number of orders the driver delivered during his shift.
18.	Trip Count	The total number of runs the driver made during his shift.
19.	Avg. Order/Trip & Avg. Trip Duration	The average number of orders and average duration of each trip.
20.	Avg. In Store Time	The average time each order was in the store.

There are no report settings available to control the Speed of Service Delivery report.

Driver Details report

The Driver Details report enables you to focus on driver accountability with payment types, tips, and driver fees for each delivery.

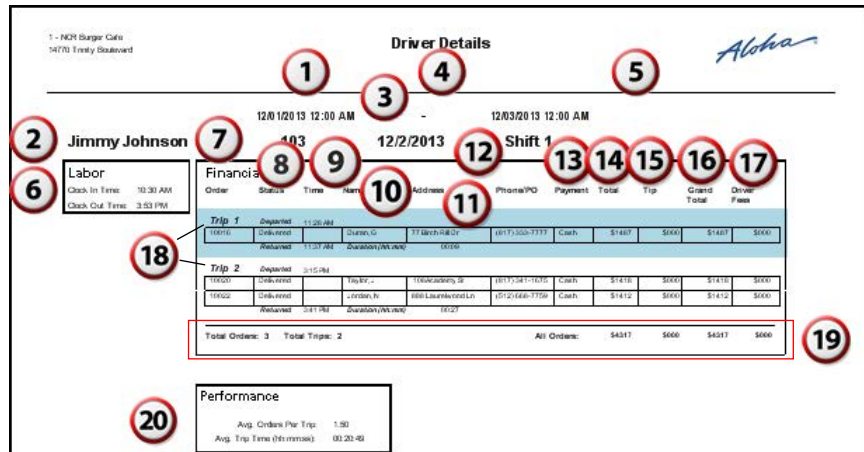

Figure 2 - 6 Driver Details Report

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Driver Name	The name of the driver.
3.	Employee Number	The Aloha POS assigned employee number.
4.	Date	The date for the report information.
5.	Shift	The shift(s) the driver worked for the selected date range.
6.	Labor	The clock-in and clock-out times for the driver.
7.	Order	The Aloha check number.
8.	Status	The order status. This could be Pending, In Transit, Recalled, or Delivered, depending on when you run the report.
9.	Time	The departure and arrival time for each trip.
10.	Name	The customer name.
11.	Address	The selected delivery address for the customer.
12.	Phone	The selected phone number for the customer.
13.	Payment	The form of payment used on the check.
14.	Total	The total amount due on the check.
15.	Tip	The tips entered for the check.
16.	Grand Total	The grand total of the check.

#	Column	Description
17.	Driver Fees	The order mode charges applied to the check.
18.	Trip X	A group of deliveries dispatched as a run.
19.	Summary	The summary statistics for all of the delivery runs of a driver.
20.	Performance	The average number of orders per trip, as well as the average trip time.

There are no report settings available to control the Driver Detail report.

Late Orders report

The Late Orders report enables you to target the orders that were not dispatched to the driver on time.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Order	Status	Date	Est. Time	Act. Time	Variance (Hours)	Name	Address	Phone/PO	Payment	Total	Tip	Grand Total	Driver	Driver Fees
Total Orders: 0										\$0.00	---	---	---	---

Figure 2 - 7 Late Orders Report

#	Column	Description
1.	Order	The order number.
2.	Status	The status of the order.
3.	Date	The date the order was submitted.
4.	Est. Time	The promise time of the order.
5.	Act. Time	The time the order was delivered.
6.	Variance	The difference between the estimated time and the actual time of the order.
7.	Name	The name associated with the order.
8.	Address	The address associated with the guest.
9.	Phone/PO	The phone number of the guest.
10.	Payment	The tender used to pay for the order.
11.	Total	The total amount of the order, excluding tip.
12.	Tip	The tip amount added to the order.
13.	Grand Total	The total amount of the order, including tip.
14.	Driver	The name of the driver dispatched for the report.
15.	Driver Fees	The driver fee associated with the order.
16.	Total Order	The total for all orders on the report.

There are no report settings available to control the Late Orders report.

Delivery Dispatch report

The Delivery Dispatch report tracks the time between the creation of an order and the time you dispatched the order. This allows you to evaluate the efficiency of your staff when dispatching orders for delivery; in particular, if the staff dispatched the order within a specified amount of time.

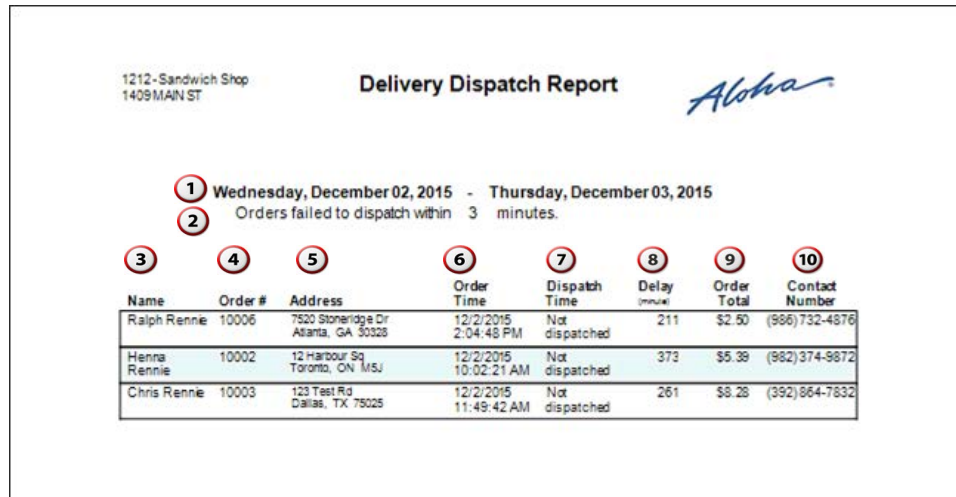

Figure 3 Delivery Dispatch Report Example

#	Column	Description
1.	<date range>	The selected date range for the report.
2.	<threshold>	The selected number of minutes for which the staff failed to dispatch the order.
3.	Name	The name of the guest.
4.	Order #	The order number of the check.
5.	Address	The address associated with the order.
6.	Order Time	The time at which the guest placed the order.
7.	Dispatch Time	The time at which the staff dispatched the order. If the order was never dispatched, 'Not dispatched' appears.
8.	Delay (minute)	The variance between the order time and the dispatch time.
9.	Order Total	The total amount of the order.
10.	Contact Number	The telephone number associated with the guest.

1. On the Reports menu, select the **Delivery Dispatch** report. The Dispatch Report Control dialog box appears.

The image shows a 'Dispatch Report Control' dialog box. It has a title bar with a dropdown arrow and the text 'Dispatch Report Control'. Inside the dialog, there is a label 'Show orders that were not dispatched within' followed by a text input field containing the number '1' and a spinner control, and the word 'minutes.'. Below this is a label 'Sort result by:' followed by a dropdown menu showing 'Name'. At the bottom, there are two radio buttons: 'Ascending' and 'Descending', with 'Descending' being selected.

Figure 2 - 1 Report Data Selection

2. Select the **number of minutes** for which the staff failed to dispatch the order.
3. Select the **sort method** for the report.
4. Select **Ascending** or **Descending** to sort the report A-Z or Z-A.
5. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Open Order report

The Open Order report enables you to check for any open orders with ATO before running End of Day. You define the information to include on the report. You have the option to include or exclude

orders in a variety of states; however, a maximum of seven columns can appear in the Open Order report.

Figure 2 - 2 Open Order Report

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Name	The customer name.
3.	Address	The selected delivery address for the customer.
4.	Order	The Aloha POS check number.
5.	Status	The order status. This could be Abandoned, Cooking, Kitchen Delay, Closed, or Pre-delay, depending on when you run the report.
6.	Phone	The selected phone number for the customer.
7.	Order Mode	The order mode applied to the order.
8.	Time Closed	The time the order was closed in the system.

1. On the Reports menu, select the **Open Order** report. Two report filters appear.

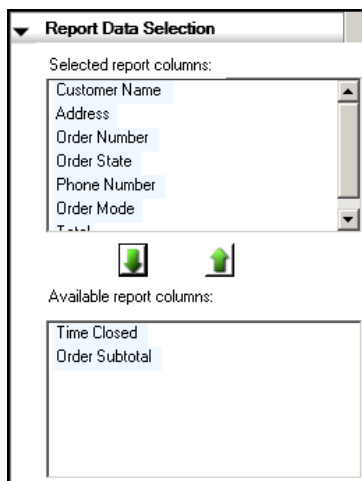

Figure 2 - 3 Report Data Selection

2. Under the 'Report Data Selection' group bar, identify **each column** to include on the report. Use the up arrow to move a filter from the 'Available' column to the 'Selected' column and use the down arrow to move a filter from the 'Selected' column to the 'Available' column.
3. Under the 'Report Filters' group bar, identify which **order states** to include in the report.

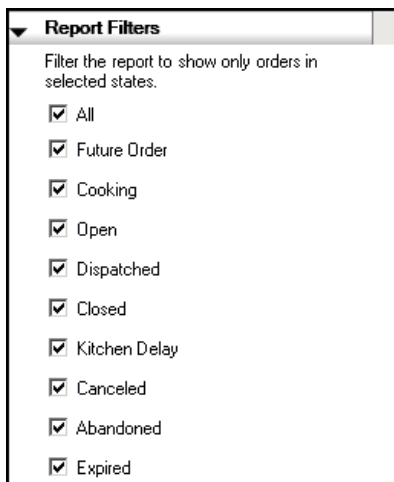

Figure 2 - 4 Report Filter Selection

4. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Future Orders report

The Future Orders report displays the details for future orders in the system for the date range selected. The contact information for the customer prints above the order. You define the information to include on the report. You can choose to have individual orders print on separate pages.

The screenshot shows the 'Future Orders' report interface. At the top left, it lists '1 - NCR Burger Cafe' and '14770 Trinity Boulevard'. The title 'Future Orders' is centered, with the 'Aloha' logo on the right. A date range selector (1) shows 'Sunday, 1 December 2013, 12:00 AM' to 'Saturday, 7 December 2013, 12:00 AM'. Below this, customer information is displayed: name 'Cory Wayne' (2), address '102 Oxford Arlington, TX 76016' (3), and phone '(512) 341-1675' (4). A time and mode selector (5) shows 'Wednesday, 4 December 2013, 12:30' and 'Mode: Call In' (6). The main table (7) lists items: '9 Greek Salad' at \$5.95 each (\$53.55 total) and '6 Delx Greek Sal' at \$6.95 each (\$41.70 total). At the bottom right, a summary box (8) shows 'SubTotal: \$95.25', 'Tax: \$6.67', and 'Total: \$101.92'. A note 'No pending payments.' is on the bottom left.

Figure 2 - 5 Future Orders Report

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Name	The customer name.
3.	Address	The selected delivery address for the customer.
4.	Phone Number	The selected phone number for the client.
5.	Time	The promised date and time for the order
6.	Mode	The particular order mode applied to the order.
7.	Order Details	The item, quantity of items ordered, unit price, and extended price.
8.	Total	The subtotal, tax, and total of the order as well as whether or not there are any pending payments for the order.

1. On the Reports menu, select the **Future Orders** report. Two group bars appear, Layout and

Display Controls.

Figure 2 - 6 Future Orders Display Controls

2. Under the 'Layout' group bar, select **Print Orders on Separate Pages** to have your future orders print on individual pages.
3. Select **Display Order Items** to display the items each customer ordered.
4. Select **Display date range** to include the range in which the report is generated.
5. Select **Display pending payments** to include any orders that have a deposit or pending payment.
6. Select **Organize by company** to sort the orders by company name for which the customer works. You must have a company defined for the guest.
7. Select **Sort orders by name** to sort orders by the name of the guest. You can sort orders ascending or descending.

8. Select **Display order sundries** to include a separate subsection with order sundries from bag and order manifest items. Use these sections as a preparation sheet of manifest items and eliminate the need to print the manifest from a local receipt printer.
9. Select **Display item sundries** to include a separate subsection with item sundries from bag and order manifest items. Use these sections as a preparation sheet of manifest items and eliminate the need to print the manifest from a local receipt printer.
10. In the 'Filters' box, select the **filters** to apply to the report.
 - Select **Show all orders** to only include all future orders for the selected date.
 - Select **Show only orders with pending payments** to only include orders with a pending payment.
 - Select **Show only orders with deposits** to only include orders with a deposit.
 - Select **Show only orders fully paid with deposits** to only include orders with a deposit which are paid in full.
11. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Future Order Item Summary report

The Future Order Item Summary report displays a summary of items on order for a future date. This report allows you to see the items you need so that you can ensure you have enough product to produce the scheduled orders or that you have sufficient time to produce the ordered items. For example, in a restaurant where food may take longer to prepare, use this report to identify how many

items to prepare in advance. Additionally, you can configure the report to show any item modifiers on order with the ordered items.

Deposit Count: 1			Total Amount: \$25.00					

Figure 2 - 9 Pending Deposits Report

#	Column	Description
1.	Deposit	The internal, system-generated number to track individual deposits.
2.	Guest Name	The customer name.
3.	Address	The selected delivery address for the customer.
4.	Phone/PO	The selected phone number for the customer.
5.	Invoice Number	The unique, system generated number for the order.
6.	Amount	The deposit amount.
7.	Description	The date the deposit was applied.
8.	Depositing Employee	The employee who accepted the deposit. The report displays the Aloha employee ID number of the employee.
9.	Status	The current status of the deposit. Generally, this field displays as 'Deposited' unless another deposit is in process on a terminal at the time the report is run.
10.	Summary	The total number of and total amount of pending deposits.

There are no report settings available to control the Pending Deposits report.

New Deposits report

The New Deposits report displays the deposits accepted within a specified date range. Typically, you run this report for the current day to balance against the payment report.

The screenshot shows the 'New Deposits' report interface. At the top left, it says '1 - NCR Burger Cafe 14770 Trinity Boulevard'. The title 'New Deposits' is centered at the top. Below the title, there are two date range selectors: '11/01/2013 12:00 AM' and '12/01/2013 12:00 AM'. The Aloha logo is in the top right corner. The main table has columns: Deposit, Guest Name, Address, Phone/PO, Invoice Number, Amount, Description, Depositing Employee, and Status. There are two rows of data. Below the table, it shows 'Deposit Count: 2' and 'Total Amount: \$50.00'. Numbered callouts 1 through 11 point to various elements: 1 points to the title, 2 to the Deposit column, 3 to the Guest Name column, 4 to the Address column, 5 to the Phone/PO column, 6 to the Invoice Number column, 7 to the Amount column, 8 to the Description column, 9 to the Depositing Employee column, 10 to the Status column, and 11 to the summary row at the bottom.

Deposit Count: 2 Total Amount: \$50.00

Figure 2 - 10 New Deposits

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Deposit	The internal, system-generated number to track individual deposits.
3.	Guest Name	The customer name.
4.	Address	The selected delivery address for the customer.
5.	Phone/PO	The selected phone number for the customer.
6.	Invoice Number	The unique, system generated number for the order.
7.	Amount	The deposit amount.
8.	Description	The date the deposit was applied.
9.	Depositing Employee	The employee who accepted the deposit. The report displays the employees Aloha employee ID number.
10.	Status	The current status of the deposit. Generally, this field displays as 'Deposited' unless another deposit is in process on a terminal at the time the report is run or unless a deposit was refunded.
11.	Summary	The total number of and total amount of deposits received.

There are no report settings available to control the New Deposits report.

Withdrawn Deposits report

The Withdrawn Deposits report displays deposits withdrawn during the selected date range. Deposits may be applied, refunded, or surrendered, to be considered withdrawn.

Figure 2 - 11 Withdrawn Deposits

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Deposit	The internal, system-generated number to track individual deposits.
3.	Guest Name	The customer name.
4.	Address	The selected delivery address for the customer.
5.	Phone/PO	The selected phone number for the customer.
6.	Invoice Number	The unique, system generated number for the order.
7.	Amount	The deposit amount.
8.	Description	The date the deposit was applied.
9.	Depositing Employee	The employee who accepted the deposit. The report displays the employees Aloha employee ID number.
10.	Status	The current status of the deposit, either Applied, Refunded, or Surrendered.
11.	Withdrawing Employee	The employee applying, refunding, or surrendering the deposit.
12.	Withdrawal Date	The date the deposit was applied, refunded, or surrendered.
13.	Withdrawal Check	The Aloha POS check number used to apply, refund, or surrender the deposit.
14.	Summary	The summary statistics for the withdrawn deposits.

There are no report settings available to control the Withdrawn Deposits report.

Unclaimed Deposits report

The Unclaimed Deposits report displays the deposits that were not applied to a future order when the order was released or when an order was closed by the End-of-Day without applying the deposit. In most cases, ATO prevents this from happening by requiring you to address deposits prior to dispatching or tendering the order. In the event you do not apply a deposit, the Unclaimed Deposits report accounts for any discrepancies.

Customer Mailing List report

The Mailing List report enables you to display, print, or export the address information for the customers within your database. The Mailing List report provides you with three export report types. These export options appear on the Report Preview toolbar, see [“Exporting report data” on page 2-6](#).

Export to a Mailing List .csv file — Creates a file with the following fields: FirstName, LastName, AddressLine1, AddressLine2, City, State, and Zip.

Export to an Email List .csv file — Creates a file with the following fields: FirstName, LastName, and Email.

Export to a Detailed Customer List .csv file — Creates a file with the following fields: FirstName, LastName, AreaCode, PhoneNumber, Extension, AddressLine1, AddressLine2, City, State, Zip, Email, LastVisit, and NumberOfVisits.

Summary

Absent Customers Total: 2

Absent Customers With Valid Postal Addresses: 2

Absent Customers With Valid Email Addresses: 2

Figure 2 - 15 Absent Customer Report

#	Column	Description
1.	Customer Information	The customer name, address, phone number, and email address.
2.	Last Visited	The last date the customer placed an order.
3.	Visits	The total number of orders by the customer.
4.	Summary	The total number of absent customers as well as the number of the total number of absent customers with postal addresses and email addresses.

1. On the Reports menu, select the **Absent Customer** report. The Absent Customers dialog box

appears.

The image shows a dialog box titled "Absent Customers Dialog Box". It has a light blue background. At the top, it says "Number Of Days Absent:". Below this, there are two spinners: the first is set to "30" and the second is set to "365", with a minus sign between them. Below the spinners is a checkbox labeled "Include Customers with No Orders". Below the checkbox is a dropdown menu labeled "Sort report by:" with "Total spent" selected. At the bottom, there are two radio buttons: "Ascending" (which is selected) and "Descending".

Figure 2 - 16 Absent Customers Dialog Box

2. Select the **range** of days for which a customer did not visit the restaurant to include in the report.
3. Select **Include Customers with No Orders** to include any customers that had no orders submitted.
4. Select the **sort settings** from the 'Sort report by' drop-down list to drill down and filter the Absent Customer report. Select from Last name, First name, Total spent, Number of orders, Average spent, or Last order date.
5. Select either **Ascending** or **Descending** to sort the customer by A-Z or Z-A.
6. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Top Customer report

The Top Customer report allows you to identify those customers with the most visits within a specified time frame. You can filter the report to exclude customers who have not ordered from you recently and you can set a minimum number of orders from a customer to be considered a top customer.

Figure 2 - 20 Customer Detail Report

#	Column	Description
1.	Customer Information	The customer name, address, phone number, email address, last visit, total number of visits, and total amount of money spent at your operation.
2.	Ordered	The date and time the order was entered into the system.
3.	Promised	The promise time for the order.
4.	Status	The status of the order.
5.	Order Number	The system-generated order number.
6.	Mode	The order mode applied to the order.
7.	Order Notes	Any order notes entered into the system.
8.	Order Details	The item ordered, the quantity of each item ordered, the unit price, and the extended price.
9.	Order Total	The subtotal, tax, and total for the order.

1. On the Reports menu, select the **Customer Detail** report. The 'Customer Lookup' dialog box appears.

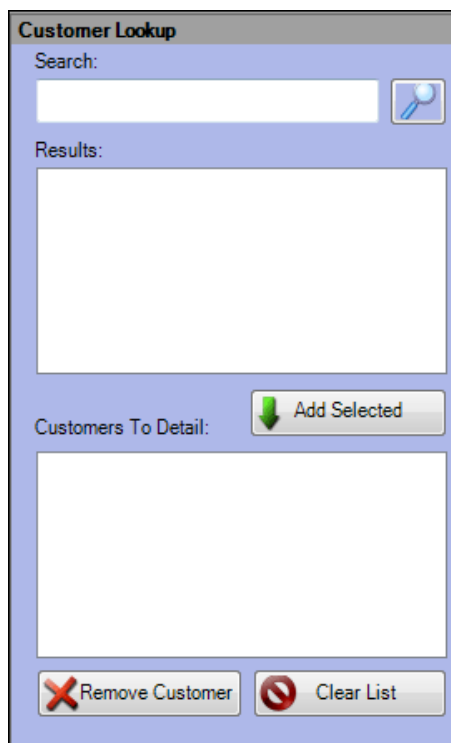

Figure 2 - 21 Customer Lookup Dialog Box

2. Type a **name** to use as search criteria and then click the **magnifying glass** to initiate the search.
3. In the 'Results' box, select the **desired customer** and click **Add Selected** to move the customer to the 'Customers To Detail' box. To remove a customer from the 'Customers To Detail' box, select the desired customer and click **Remove Customer**, or click **Clear List**.
4. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Call Back List report

The Call Back List report lists customers who ordered from you within a selected date or range of dates. You may want to use this report to ensure your customers received excellent service or to proactively address any issues.

2. Select **Show address for delivery orders** to include the address of each delivery order.
3. Select **Landscape orientation** to display and print the report in landscape format.
4. Select the **columns** to display in the report. Select from Customer, Phone, Order#, Date, Total, Promise Time, Closed Time, and Visits. For the custom selections on Call Back List report settings dialog box, refer to the next section.
5. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Using custom columns on the Call Back List report

With the Call Back List report, you can create and use custom headers to add additional columns for questions you typically ask your guests when you call them back. For example, "How was your

food?," "Was your service good?," or "Was the delivery on time?" Typically, the employee writes the response on a hard copy of the report and keeps it stored, or saves the copy as a PDF.

Figure 3 Call Back List Report with Custom Header

You can add up to five custom columns to the Call Back List Report. Once added, save the configuration as a CallBackListColumnSetup.dat file, which you can rename. You can create as many custom files as you want, to use again or send to specific stores in your organization. Once saved and placed in the ATO/Bin directory, you can upload the custom file on demand, and the additional columns appear on the Call Back List Report.

To add a custom column to the Call Back List report:

1. With ATO selected in the product panel, select **Reports > Customers > Call Back List Report**.
2. Under the 'Print' section, select **Landscape orientation** for optimal viewing of the report.
3. Under the 'Displayed columns' section ([Figure 2 - 3](#)), select an available **custom option**, and type the **question** to appear as a column . If you do not select the check box, the system keeps the question, but it does not appear on the report.
4. Repeat **Step 3** for any other custom column to add to the Call Back List Report.
5. Exit the **Call Back List Report**.

When you open the report again on a local system, your custom columns remain intact. You can also save your configuration to make it portable. You may want to do this if you want to switch the custom columns out with different questions, or to transport them to another store. You need to save the columns into a CallBackListColumnSetup.dat file, which you can rename, as appropriate.

As a best practice, you should always keep CallBackListColumnSetup.dat in the ATO/Bin directory.

To save the custom column configuration to the Call Back List report:

1. With ATO selected in the product panel, select **Reports > Customers > Call Back List Report** or you can continue from the previous procedure.
2. Under the 'Displayed columns' section, click **Save column setup** (Figure 2 - 3). The Save As dialog box appears.

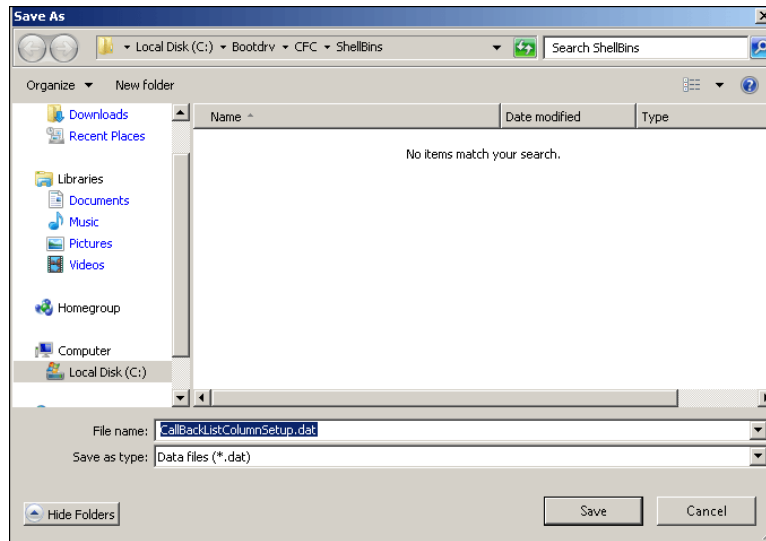

Figure 4 Save As Dialog Box

3. If needed, type a **name** for the custom column configuration. The default name is CallBackListColumnSetup.dat.
4. Navigate to the **directory** in which you want to save the file. We recommend saving the file in the ATO/Bin directory.
5. Click **Save**.

To load a CallBackListColumnSetup.dat file:

1. With ATO selected in the product panel, select **Reports > Customers > Call Back List Report**.
2. Under the 'Displayed columns' section, click **Load column setup**. The Open dialog box appears.
3. If needed, navigate to the **directory** from which to load CallBackListColumnSetup.dat.
4. Select the **file** and click **Open**. The Call Back List Report appears with the added columns.

Customer Credit report

The Customer Credit report displays a list of customers who have a credit balance with your organization.

Catering Summary report

The Catering Summary report displays information regarding any future catering orders for the future date or date range selected.

The screenshot shows the 'Catering Summary Report' interface. At the top left, it says '1 - NCR Burger Cafe' and '14770 Trilly Boulevard'. The title 'Catering Summary Report' is in the center, with the 'Aloha' logo on the right. Below the title, a date range is selected: 'Tuesday, December 17, 2013 12:00 AM - Friday, December 20, 2013 12:00 AM'. The report is presented as a table with columns: Date, Time, Customer PO, Status, Customer, Order Type, Total, and Payment. Two rows of data are shown for December 18, 2013, and December 19, 2013. Each row includes a 'Daily Total' and a 'Grand Total' at the bottom. Numbered callouts (1-11) point to various elements: 1 points to the date range, 2 to the Date column, 3 to the Time column, 4 to the Customer PO column, 5 to the Status column, 6 to the Customer column, 7 to the Order Type column, 8 to the Daily Total, 9 to the Total column, 10 to the Payment column, and 11 to the Grand Total.

Date	Time	Customer PO	Status	Customer	Order Type	Total	Payment
12/18/2013	12:30 PM		In Delay	Tompson, William	Pick-Up	\$159.59	\$0.00
Daily Total:						\$159.59	
12/19/2013	11:50 AM		In Delay	Diaz, Nancy	Pick-Up	\$59.18	\$30.00
Daily Total:						\$59.18	
Grand Total:						\$248.77	

Figure 2 - 3 Catering Summary Report

#	Column	Description
1.	Selected Date Range	The date range of the report.
2.	Date	The promised date for the catering order.
3.	Time	The promised time for the catering order.
4.	Customer PO	The purchase order provided by the customer.
5.	Status	The status of the order at the time of the printing of the report.
6.	Customer	The customer name.
7.	Order Type	The particular order mode applied to the order.
8.	Daily Total	The calculated total of the orders for the day.
9.	Total	The calculated total for the order.
10.	Payment	The payments applied to the order.
11.	Grand Total	The calculated total for all future catering orders.

There are no report settings available to control the Catering Summary report.

Catering Detail report

The Catering Detail report allows you to ensure you have enough product to produce the scheduled orders or that you have sufficient time to produce the ordered items. You can print orders on

separate pages, to assist the kitchen and other employees in organizing, producing, and staging the orders.

3. Click  in the Report Preview toolbar to run the report. The report appears in the Report Preview screen.

Company Detail report

The Company Detail report generates orders from companies that orders from you. You can filter or sort the report by office address. If you do not enter the address for the company, or use a home address, orders for the company do not appear. Use this report to query the ordering history of a company, for such things as thanking frequent customers, checking back with companies who have not ordered from you for a while, and more. The Company Detail report provides detailed

information for each company, by address and then by person from the company who placed the order.

The screenshot shows the 'Company Detail Report' for a company named 'Windows'. The report is divided into two main sections, each for a different order date. The first section is for 'Tuesday, December 08, 2015' and the second is for 'Monday, December 07, 2015'. Each section includes a table of items ordered, a subtotal, tax, and order total. The report also shows the company's address and phone number, and the order mode (Call in for the first order, Delivery for the second).
