Aloha Takeout Using Connected Payments

Last Updated: January 19, 2024

Connected Payments offers merchants secure and flexible payment support, while helping them manage a multitude of payment options in a tightly regulated industry. The SaaS solution leverages flexible Microsoft[®] architecture, as well as redundant active/active data centers with real-time data replication, to provide rich payment functionality.

This guide assists you in successfully implementing and using Connected Payments with Aloha[®] Takeout (ATO). This guide addresses configuration in ATO only and assumes you already have Connected Payments installed and working. Contact your Connected Payments representative for more information.

Configuring Connected Payments in ATO

To configure Aloha Takeout for use with Connected Payments, add the custom setting required for Connected Payments to Takeout Settings in ATO and align the APS (Aloha Payment Solutions) tender.

To add the Connected Payments setting to ATO:

- 1. With AT selected in the product panel, select Maintenance > Takeout Configuration > Takeout Settings.
- 2. Select the Custom tab.
